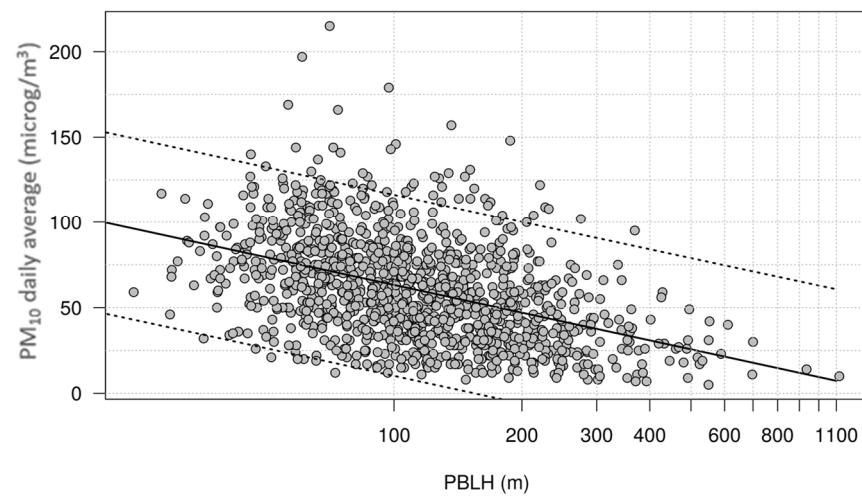

**Figure S1.** Air quality trends for PM<sub>10</sub> (90.41 percentile daily average) measured at 3 urban-traffic stations in Torino (IT), Düsseldorf (DE) and Krakow (PL).

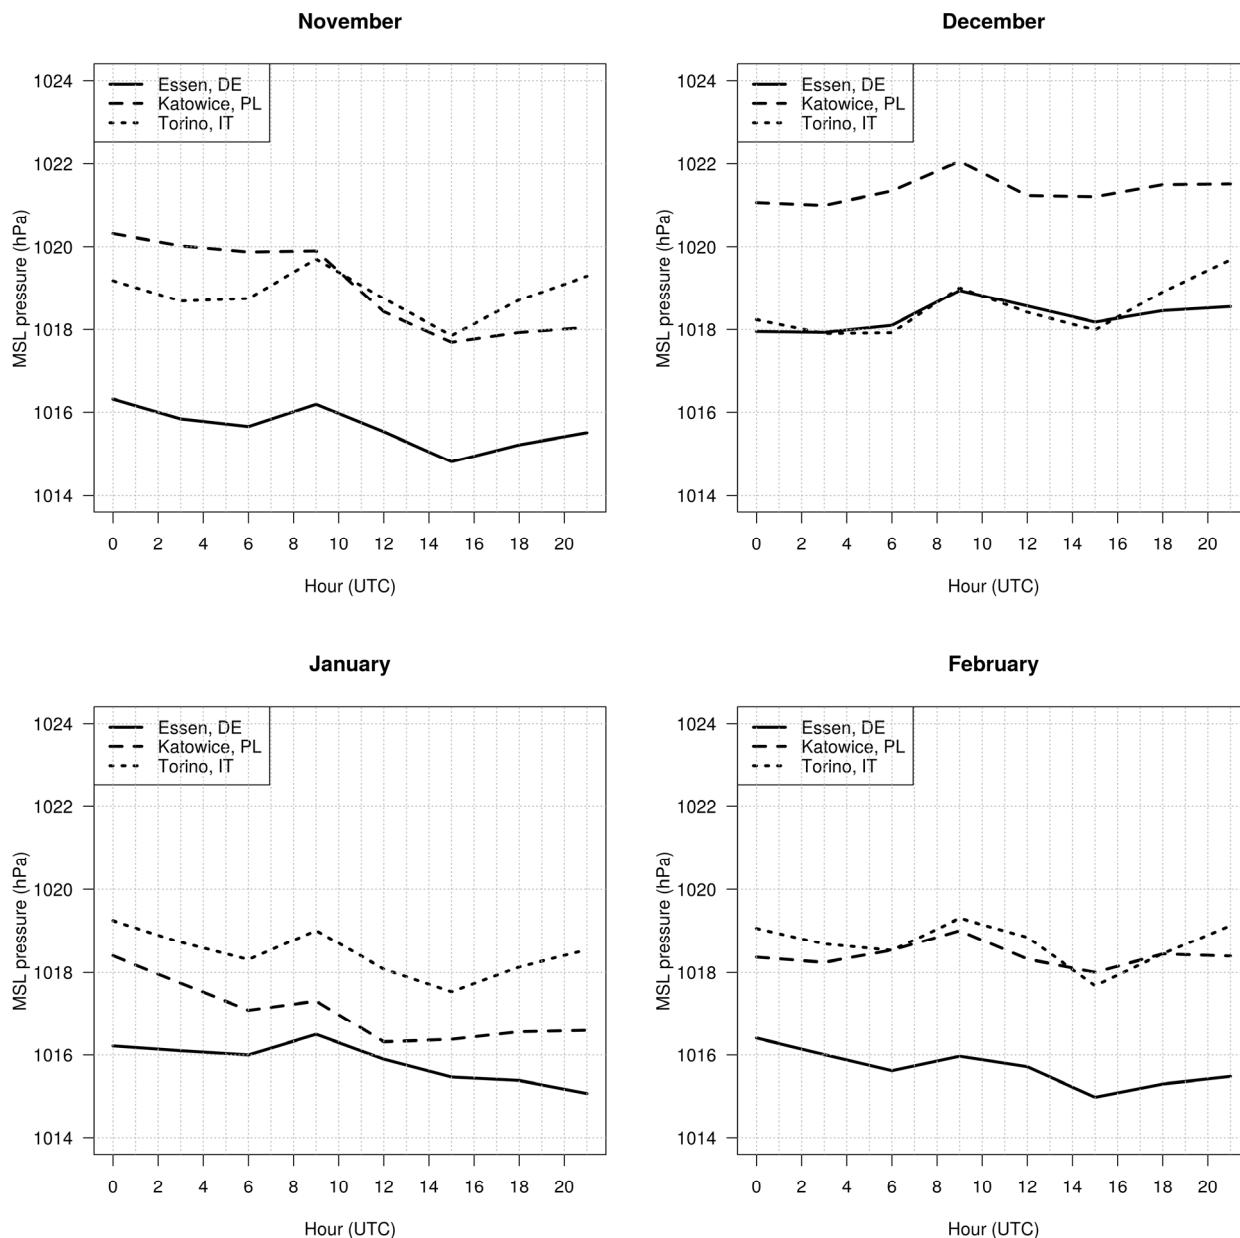

**Figure S2.** Air quality trends for PM<sub>10</sub> (90.41 percentile daily average) measured at 3 urban-background stations in Torino (IT), Düsseldorf (DE) and Krakow (PL).

**Figure S3.** PBL height (monthly average) in Torino (IT), Essen (DE) and Katowice (PL), average values from 1979 to 2020.

**Figure S4.** Correlation between PBL height and PM<sub>10</sub> daily averages measured in Torino (N-W Italy) in the period from 2011 to 2020.

**Figure S5.** Mean sea level pressure diurnal pattern in Torino (North Western Italy), Essen (North Western Germany) and Katowice (Southern Poland) during the cold season (average values from 1979 to 2020).

**Table S1.** Emission reduction of the main air pollutants by Member State from 2005 to 2019.
