File S1. Literature search on relations between chlorophenols, chloroanisoles and mold

Web of Science and PubMed were searched using the search string: “(mold OR mould OR mildew) AND (chlorophenol: OR monochlorophenol: OR dichlorophenol: OR trichlorophenol: OR tetrachlorophenol: OR pentachlorophenol: OR chloroanisole: OR monochloroanisole: OR dichloroanisole: OR trichloroanisole: OR tetrachloroanisole: OR pentachloroanisole:)”. In addition to the chemical names, all relevant CAS numbers (Table S1) were included in the search. The search was performed on 16 October 2023.

Web of Science

The search in Web of Science resulted in 34 hits, listed below. None of the 34 studies addresses odor from PCs/CAs in relation to the extent of mold on treated wood. One study [12] describes visible mold in wine cellars, but not on CP-treated wood. Four of the papers [11,17-19] are cited in our manuscript for other reasons.

PubMed

The search in PubMed resulted in 542 hits (not shown). Of these 542 papers, 28 remained (listed below) after excluding studies based on title. Based on full papers [8,9,16,17,21,23] or abstracts (remaining papers), none of the 28 studies addresses odor from PCs/CAs in relation to the extent of mold on treated wood. One study [9, same as 12 in the Web of Science search] describes visible mold in wine cellars, but not on CP-treated wood. Three studies [8,16,17] are cited in our manuscript for other reasons. Notably, only 12 of the 34 hits in Web of Science [5,6,8,11,12,16,18,19, 24,25,28,30] were found among the 542 hits in PubMed.
