

Figure S1. Expression and purification of recombinant CpStefin protein. **A.** The expression of recombinant CpStefin protein. M: protein Marker; 1: uninduced control; 2: total supernatant protein after IPTG induction; 3: total protein of whole liquid after IPTG induction; 4: total protein of precipitation after IPTG induction. **B.** The purification of recombinant CpStefin protein. M: protein Marker; 1: purified CpStefin recombinant protein.
