

Supplementary Figure S1. ESI-MS positive ion scanning spectra for GABA (a) and muscimol (b); Single ion monitoring mode chromatograms of AME-1 spiked with GABA (c) and muscimol (d); calibration curve of GABA (e) and muscimol (f) (n=3).

Supplementary Figure S2. Effect of AME-1 on ROS generation. HMC3 cells were treated with AME-1 and indicated concentrations for 24 hr and ROS generation was measured as indicated in Materials and Methods. Data were analyzed by one-way ANOVA with tukey post-hoc analysis and are presented as mean \pm SEM of n=3.

Supplementary Table S1. List of metabolite composition of AME-1 as analyzed by NMR
