

Supplementary Materials: Effect of the Cross-Section Morphology in the Antimicrobial Properties of α -Ag₂WO₄ Rods: An Experimental and Theoretical Study

Nivaldo F. Andrade Neto, Marisa C. Oliveira, José Heriberto O. Nascimento, Elson Longo, Renan A. P. Ribeiro, Mauricio R. D. Bomio and Fabiana V. Motta

Figure S1. Minimal inhibitory concentration (MIC) for AW30 (B, C, and D) and AW70 (E, F, and G) samples against *E. coli*.

Figure S2. Minimal inhibitory concentration (MIC) for AW30 (B, C, and D) and AW70 (E, F, and G) samples against *Salmonella* spp.

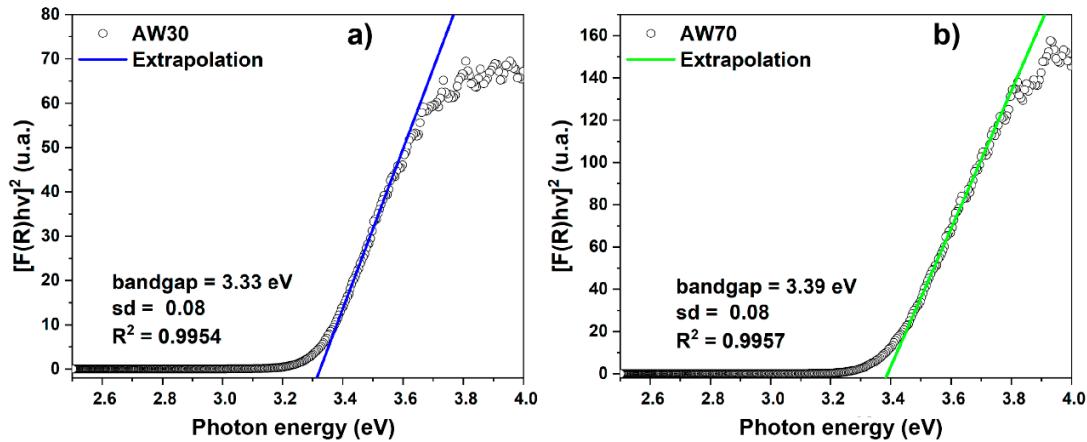

Figure S3. Experimental results for optical band-gap of AW30 (a) and AW70 (b) samples.

Table S1. Fractional coordinates obtained by the Rietveld refinement.

	AW30			AW70
