# AI, Machine Learning and Deep Learning in Signal Processing, 2nd Edition

Guest Editors:

#### Dr. Mara Pistellato

Department of Environmental Sciences, Informatics and Statistics, Ca' Foscari University of Venice, 30170 Venice, Italy

#### Prof. Dr. Byung-Gyu Kim

Department of IT Engineering, Sookmyung Women's University, Seoul 04310, Republic of Korea

Deadline for manuscript submissions:

# 30 August 2024

## Message from the Guest Editors

Recently, the entire field of signal processing has been facing new challenges and paradigm shifts due to the dramatic improvement of computational performance in hardware and an exponential increase in devices interconnected via the Internet. As a consequence, the tremendous data volume generated by such applications have to be analyzed and processed to provide useful, reliable and meaningful information.

Artificial intelligence (AI), and in particular machine (deep) learning, provides novel tools to be exploited in the field of signal processing. Consequently, new approaches, methods, theories, and tools have to be developed by the signal processing community to analyze and account for generated data volumes.

The Special Issue aims at attracting manuscripts presenting novel methods and innovative applications of AI and machine learning (including deep learning) on topics in the signal processing area. Such topics include (but are not limited to) multimedia systems, audio and video processing, and augmented and virtual reality.

## Message from the Editor-in-Chief

**Prof. Dr. Giulio Nicola Cerullo** Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

# **Author Benefits**

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
