

New Developments in Computational Linguistics to Support Decision Making

Guest Editors:

Dr. Marco Palomino

School of Natural and
Computing Sciences, King's
College, University of Aberdeen,
Aberdeen AB24 3FX, Scotland, UK

Dr. Craig McNeile

School of Engineering,
Computing and Mathematics,
University of Plymouth, Plymouth
PL4 8AA, UK

Deadline for manuscript
submissions:

20 August 2024

Message from the Guest Editors

Many interdisciplinary applications benefit from comprehending and analyzing written and spoken language. If computers recognize and understand what we write or speak, our interaction with software and machines can improve, which, in turn, enhances our ability to use the information available for strategic insights and decision making.

At present, modelling linguistic phenomena computationally relies on a variety of tools, including machine learning, deep learning, cognitive computing, neuroscience, and language analysis. This Special Issue on 'New Developments in Computational Linguistics to Support Decision Making' aims to bring together the latest research and innovations in computational linguistic tools to address the challenges of supporting decision making in several fields, such as medical diagnostics, customer service, consumer behavior prediction, production optimization, asset allocation, etc.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica,
Politecnico di Milano, Piazza L.
da Vinci 32, 20133 Milano, Italy

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
