# Recent Applications of Machine Learning in Natural Language Processing (NLP)

Guest Editors:

#### Dr. Carlos A. Iglesias

Intelligent Systems Group, Universidad Politécnica de Madrid, 28040 Madrid, Spain

#### Dr. Jinyi Zhang

School of Information Science and Engineering, Shenyang Ligong University, Nanping Center Road, Hunnan New District, Shenyang 110159, China

Deadline for manuscript submissions:

10 August 2024

### **Message from the Guest Editors**

The vibrant era of digital information has experienced a paradigm shift with the integration of machine learning in the domain of Natural Language Processing (NLP). The surge in data-driven decision making and human-like interface applications underscores the prominence and ubiquity of these technologies. This Special Issue seeks to delve deep into the recent applications of machine learning within the realm of NLP, elucidating its transformative potential in reshaping the human-computer interaction paradigm.

Relevant areas of exploration within this amalgamation of machine learning and NLP include, but are not restricted to:

- Sentiment Analysis;
- Voice Analysis and Processing;
- Entity Recognition;
- Syntax Analysis;
- Machine Translation and Summarization;
- Large Language Models;
- Question Answering;
- Chatbots and Conversational Agents;
- Image Semantic Segmentation.

In the spirit of knowledge dissemination and fostering innovation, this Special Issue aims to amass high-quality, original research papers that elucidate the recent applications, challenges, and future prospects of machine learning in NLP.

# **Prof. Dr. Giulio Nicola Cerullo**Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

## **Message from the Editor-in-Chief**

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Multidisciplinary*) / CiteScore - Q1 (*General Engineering*)
