submissions:

closed (3 March 2024)

Message from the Guest Editor

Existing treatment modalities in psychiatry, whether biological or psychosocial in nature, are not universally effective. A wide range of variations are observed in the response to these treatments, from complete symptomatic remission to non-response. Due to this, there has been a growing interest in combining different modalities of treatment, both within and across these classes, to optimize mental health outcomes and cost-effectiveness while minimizing adverse events. Recent research has shed light on genetic, biological, and psychosocial factors that may help in predicting treatment response. The purpose of the current Special Issue is to highlight both existing knowledge and cutting-edge research in this field. Both original research and well-conducted reviews on various forms of combined treatment in psychiatry, covering issues such as the efficacy, safety, and prediction of treatment outcomes, will be considered for publication. Emphasis will be placed on work that is innovative in nature and that has well-defined implications for clinical practice or future research in this field.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
