Deadline for manuscript submissions:

closed (15 April 2024)

Message from the Guest Editor

Dear Colleagues,

The aging of the global population is a trend that continues to rise, with an increasing number of individuals reaching their golden years. This emphasizes the importance of addressing age-related health concerns, including debilitating neurological conditions such as dementia, stroke, and Parkinson's disease. These diseases not only affect patients but also caregivers and families, and they have a far-reaching impact on both the economy and society.

However, the rapid advancement of genetics, lifestyle factors, digital health, and imaging techniques has greatly increased our understanding of these conditions. In response to this growing public health concern, the *International Journal of Environmental Research and Public Health (IJERPH)* has issued a call for papers that delve into the intricate relationship between aging and the development of neurological conditions. This provides a platform for authors to contribute to ongoing efforts to improve our understanding of these conditions and develop new therapeutic strategies to enhance the lives of those affected.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
