Queirós**

**Dr. Benito Yañez-Araque**

### **Message from the Collection Editors**

The objective that we propose in this Special Edition is to bring together the latest research framed in the culture of care, its evolution in societies, care economics, and care management, highlighting the gender perspective. Likewise, we propose to do this through the adoption of transdisciplinary approaches that prioritize in these studies relational analysis in the context of health scenarios, ideologies, and people.

Therefore, studies are justified in relation to health and illness, the culture of care, and the profile (sex/gender) of the care provider. This Special Issue seeks studies with different quantitative and qualitative methodologies, as well as studies of mixed methods. Reviews following quality criteria will also be considered. We particularly welcome research projects that adopt a multisectoral and transdisciplinary approach.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
