Message from the Guest Editor

Dear Colleagues,

Chronic otitis media can be classified into a mucosal (inactive, active, and healed) type and a squamous disease (retraction and cholesteatoma). According to the type of chronic otitis media, treatment can be very different, with treatment options changing significantly over the years. Surgical treatment can sometimes be very challenging, especially for cholesteatoma.

This Special Issue on chronic otitis media will focus on its current indications and surgical treatment and on an evaluation of hearing and surgical outcomes.

I am pleased to invite you as author or as part of a research group to share your scientific experience focusing on the abovementioned topics, via an original manuscript that will be published in this Special Issue.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
