### **Message from the Guest Editor**

This special issue on "Industrial Management Control Systems for Sustainable Development" aims to bring together the most outstanding research and comprehensive coverage of all aspects related to management control for sustainable development, covering a wide range of technologies, tools, and techniques to generate sustainable development through industrial control mechanisms. This special issue will bring together high-quality research articles on different aspects of Management Control Systems, including the current situation and outstanding challenges in sustainable development. Topics include, but not limited to:

- Control modelling for sustainable development. Reviews of the state of the art, including predictions, future scenarios, or future challenges.
- Tools of control and sustainability in industrial SMEs and supply and distribution chains.
- Impact of the management and control of the sustainable development in the food industry, pharmaceutical, or other industries that generate high ranges of waste.

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
