# Message from the Editor-in-Chief

*Taxonomy* is an international, scientific, peer-reviewed, open access journal published online by MDPI. The publications cover the identification, classification and description of species. It publishes original research articles, reviews, reports, conference proceedings (peer-reviewed full articles) and communications. We also encourage timely reviews and commentaries on topics of interest to the community.

## Aims

*Taxonomy* (ISSN 2673-6500) is an international and interdisciplinary open access journal. It publishes original research articles, review articles, and communications that cover the conception, naming, and classification of groups of organisms, including but not limited to animals, plants, viruses, and microorganisms. It particularly emphasizes the importance of taxonomy, with contributions which address the implications of all fields for taxonomy, or which improve our understanding of all fields through taxonomic knowledge, especially in relation to the nature, origins, and conservation of biodiversity, at all taxonomic levels.

There is no restriction on the maximum length of the papers. Our aim is to encourage scientists and research groups to publish experimental and theoretical results of research in as much detail as possible. Full experimental details and/or study methods must be provided for research articles so that the results can be reproduced.

---

## Scope

Research fields of interest include but are not limited to the following:

- Taxonomy, evolution, and biodiversity
- Biological classification
- Microtaxonomy and macrotaxonomy
- Taxonomic rank and hierarchy
- Alpha and beta taxonomy
- Linnean taxonomy, including pre- and post-Linnean taxonomy
- Identification and description of species
- Biodiversity mapping and cataloging life
- Standardization of model organisms
- Classification of organisms according to a variety of criteria
- Comparative morphology
- Taxonomic revision

---

## Author Benefits

### Open Access

Unlimited and free access for readers

### No Copyright Constraints

Retain copyright of your work and free use of your article

### Thorough Peer-Review

### Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

### No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

### Coverage by Leading Indexing Services

AGRIS, Scopus and other databases

### Rapid Publication

A first decision is provided to authors approximately 45.2 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the second half of 2023)
