Institute of Polar Sciences (CNR-
ISP), Rome, Italy

Deadline for manuscript
submissions:

20 June 2024

Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to investigate and understand the sources, fate, transport, and effects of persistent and emerging organic contaminants on natural ecosystems. These contaminants are spread in all environmental compartments at middle and high latitudes due to their worldwide production and consumption related to anthropogenic activities. Most of these organic micropollutants cause adverse effects on organisms at different levels of the trophic web. In this scenario, the investigation of the potential effects and toxicity associated with their occurrence in abiotic and biotic natural compartments can not be negligible. This Special Issue will update the state-of-the-art and partially fill the knowledge gap regarding these contaminants.

Scientifique (CNRS), University of
Toulouse, Campus ENSAT,
Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (*Water Science and Technology*)
